# Tools and technologies of the Project

RB

# Main responsibilities

Development of a single-page web application in accordance with the terms of reference and layouts. Close cooperation with the team of backend and designers.

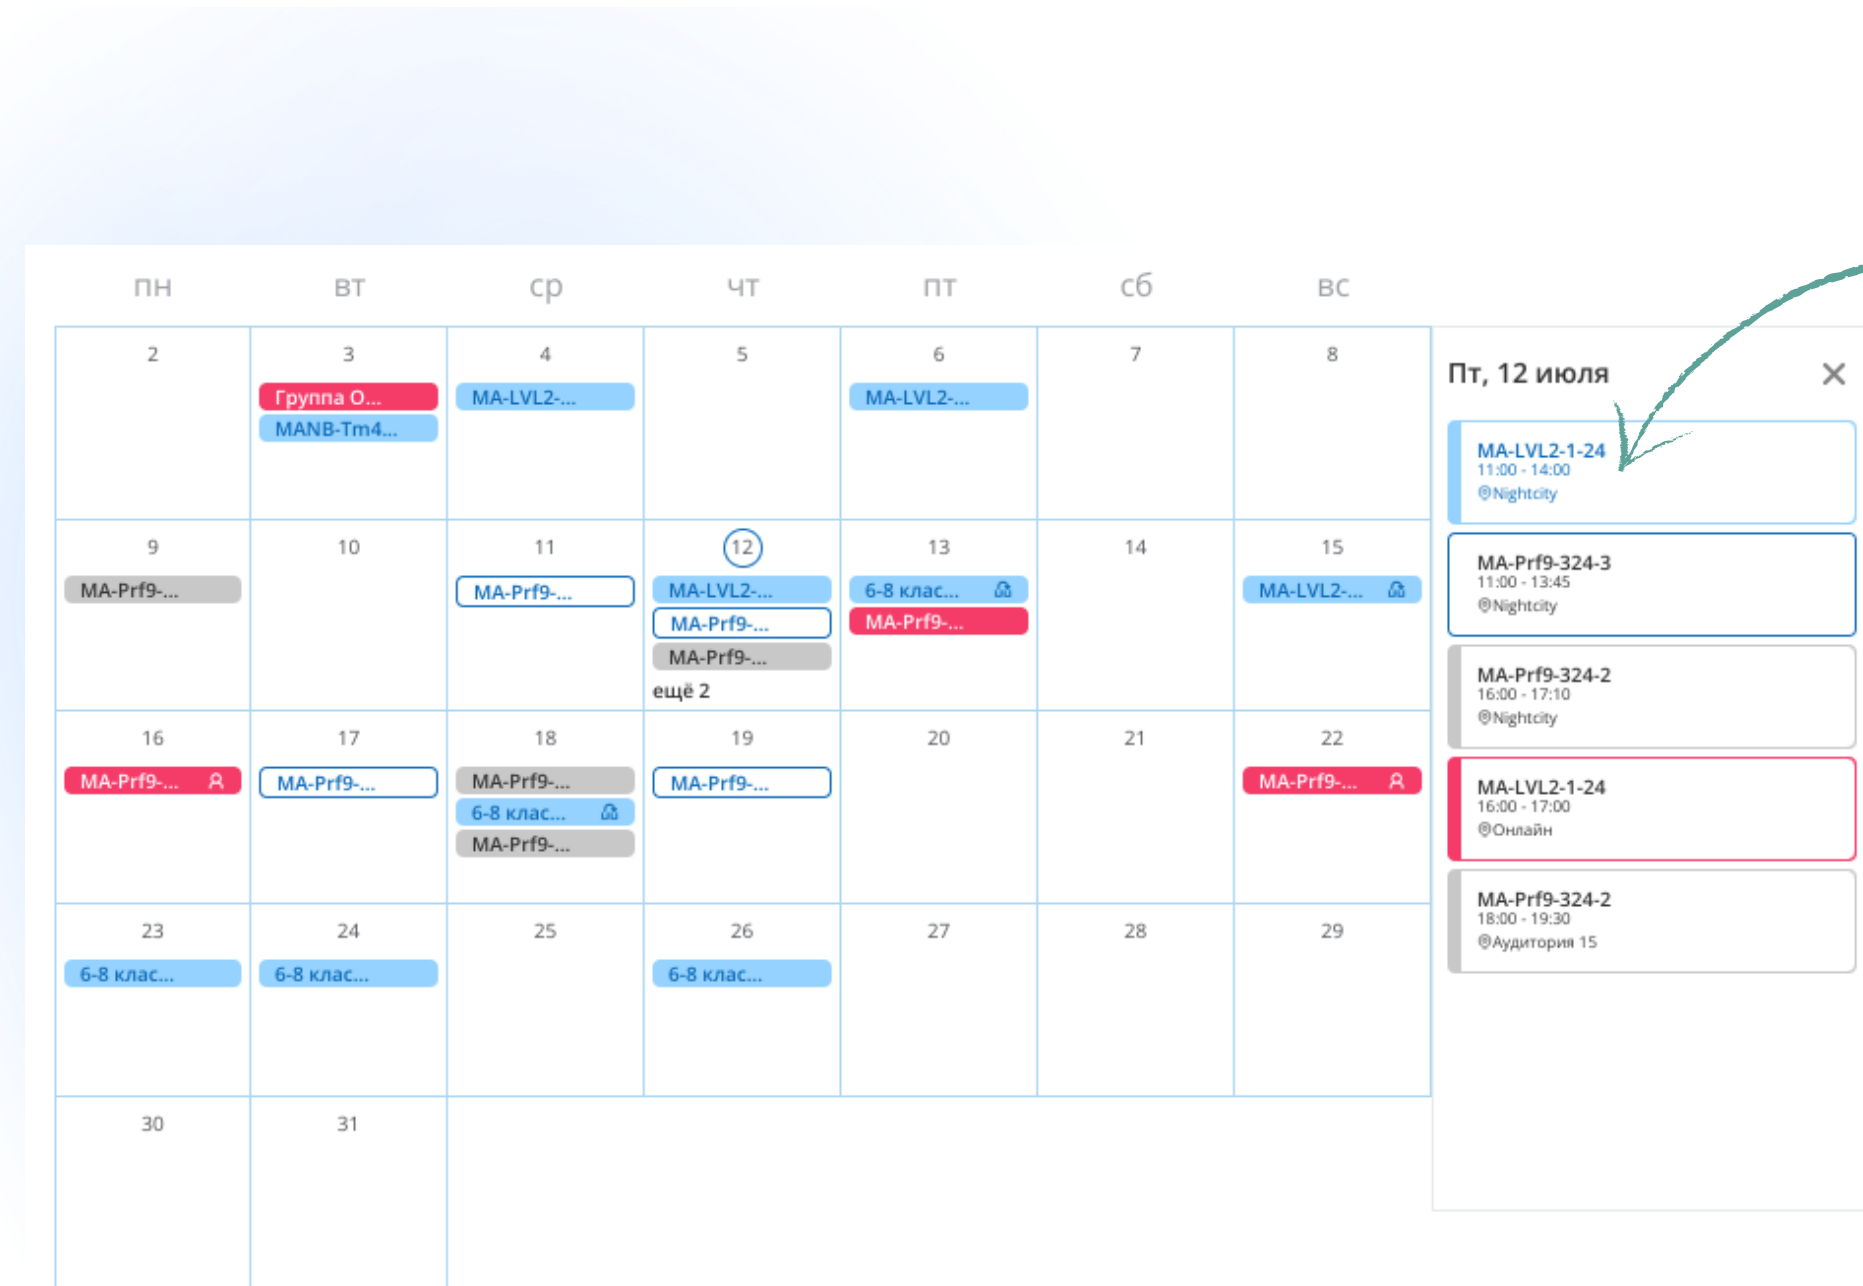

- Develop new features for users
- Integrating with backend systems
- Optimizing performance
- Fixing existing problems

# Schedule for the Teacher

One of the most interesting cases is the creation of an intuitive and convenient schedule interface for teachers in a separate window with complete information about the lesson.

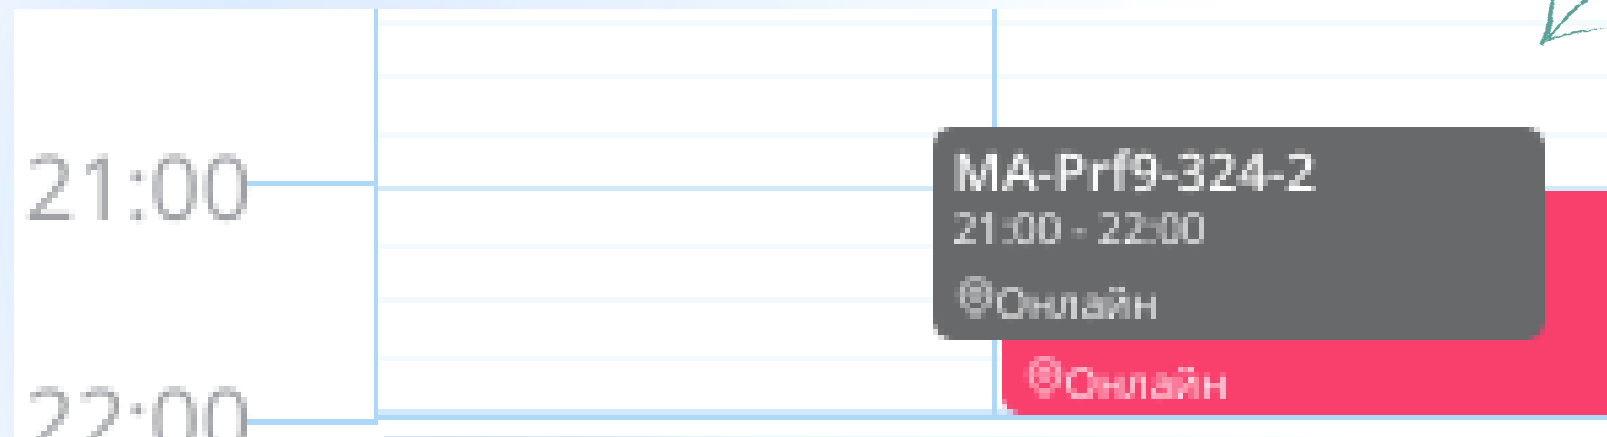

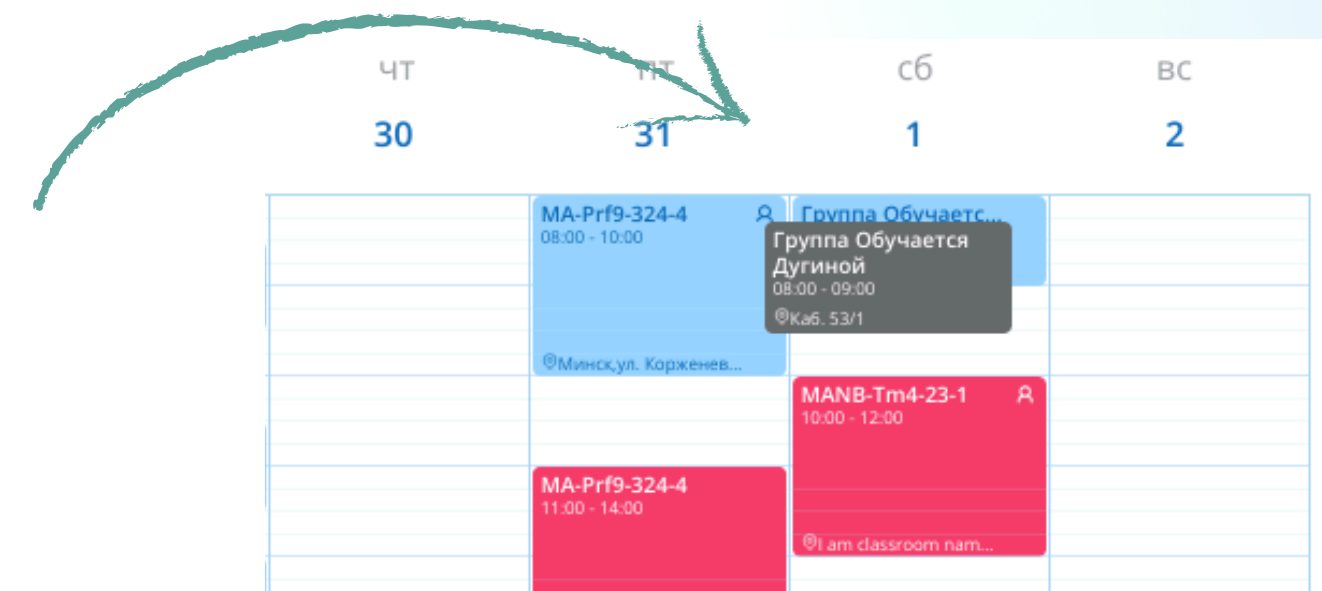

This window appears by clicking on the selected day in the calendar. Classes are filtered by class start time.

```
return [
  showHelpWindow && (
    <div className={card}>
      <div className={card_header}>
        <div className={card_date}>{capitalize(chooseDateMonthTable.toLocaleDateString("ru", localDateSettingsStringLong))}</div>
        <Button onClick={closeHelpWindow} className={card_closeIcon}>
          <img src={closeWindow} alt="icon" />
        </Button>
      </div>
      <div className={card_container}>
        <div className={card_block}>
          {dayData.length ? (
            renderCardHelpWindow
          ) : (
            <div className={card_message}>
              <Title title="У вас нет занятий в этот день." size="h3" propsClass={card_title} />
              <div className={card_description}>Удачной работы!</div>
            </div>
          )}
        </div>
      </div>
    </div>
  )
];
```

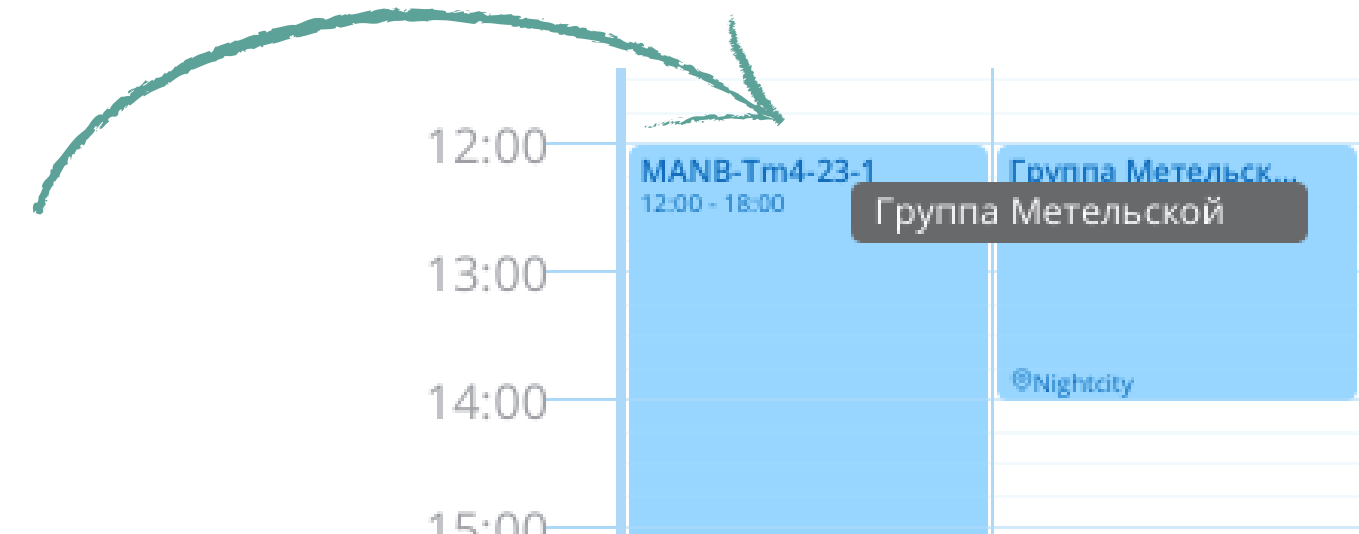

Another interesting task is to create a tooltip with detailed information.

This tooltip appears below the activity on hover when the activity is less than an hour.

This tooltip appears at the top of the activity when hovering when the class is less than an hour and starts after 20.30.

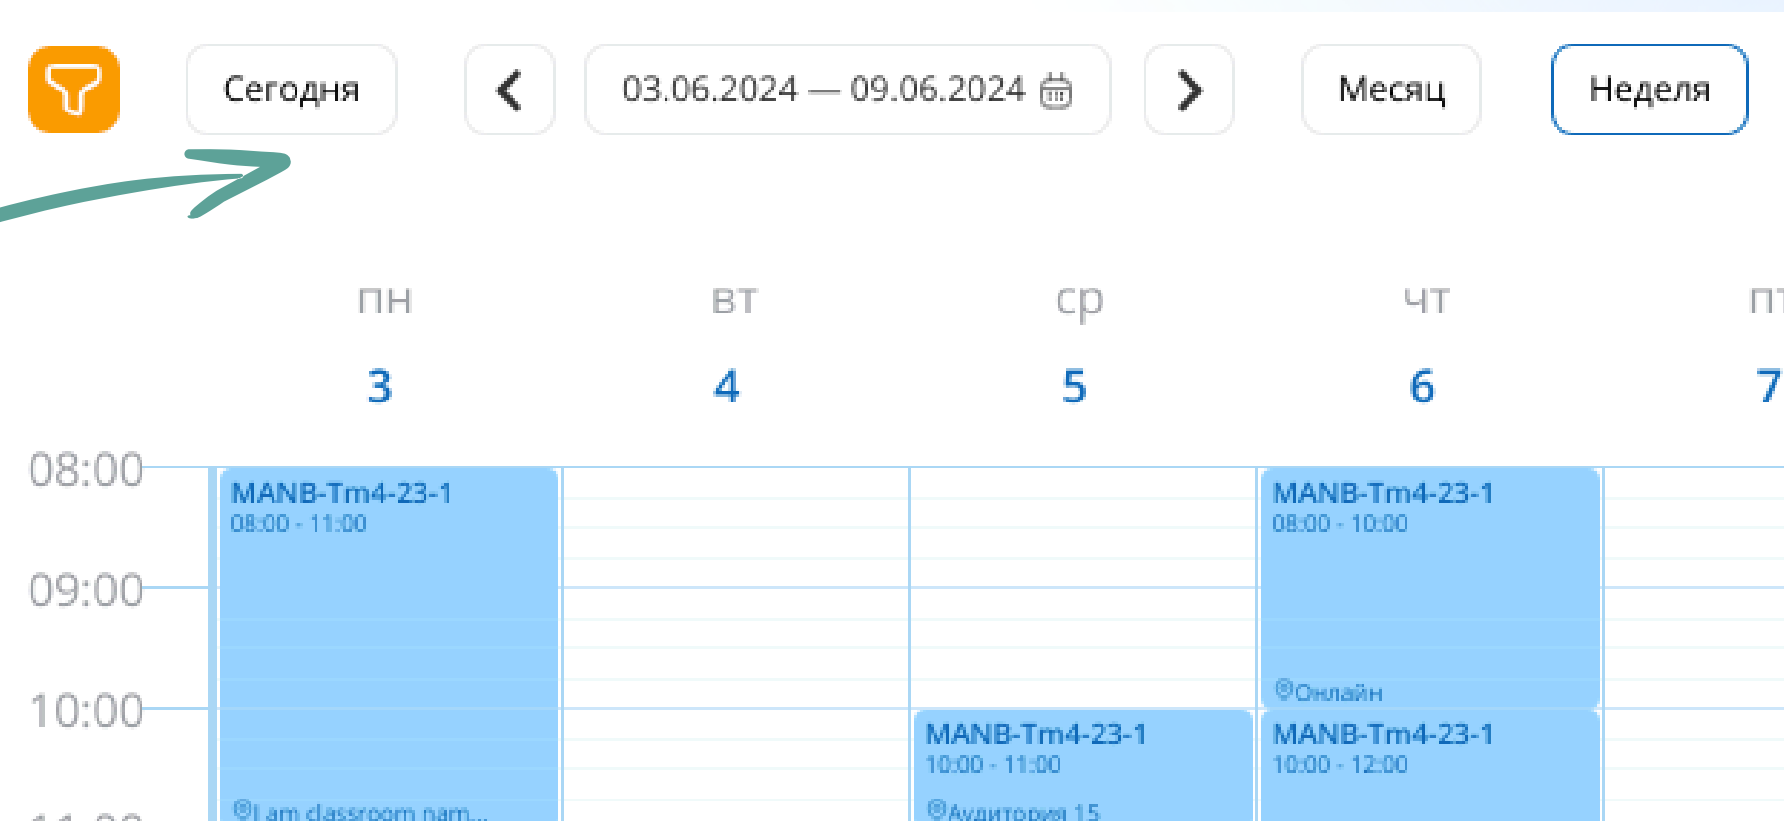

This tooltip appears when you hover over a lesson, when the lesson is more than an hour and the group name does not fit.

# Other interesting case such as:

The "Сегодня" button works correctly - when the button is clicked, it returns the user to today's date.

Thank you for your attention, Best regards, Svetlana Kurmel
